

Davis & Shirtliff partner with Liquid Telecom to start their Cloud Journey

Davis & Shirtliff is the leading supplier of water related equipment in the East Africa region, with offices in nine countries, and IT systems enabling over 900 staff.

When they were looking for a robust, scalable and secure platform to expand their business systems, they found the answer with Liquid Telecom and Microsoft.

The Liquid Telecom solution leveraged existing on-premise infrastructure, whilst moving key workloads to Microsoft Azure, with secure connections from each branch to improve performance, scalability and reliability of their IT infrastructure.

- Customer: Davis & Shirtliff
- Website: <https://www.davisandshirtliff.com>
- Customer Size: 900 staff
- Country: Kenya
- Industry: Engineering
- Products and Services: Microsoft Azure

Liquid Telecom, Davis & Shirtliff & Microsoft Azure

Customer Challenges

Davis & Shirtliff had a traditional on-premises server environment. With hardware due for replacement and increased demands for always-online systems from their branches and customers, they needed to find a solution that was cost effective, scalable and yet secure enough to handle mission critical business information.

The solution also needed to provide for easy backup and recovery to world-class standards.

Why Microsoft Azure?

As your business continues to grow, you need an intelligent and agile cloud platform that can keep up. Microsoft Azure is the answer to all your public cloud needs with an ever-expanding set of services that offers real-time access to virtual machines, developer tools and computing power.

Whether you want to extend your infrastructure or add new cloud capabilities, you have the freedom to scale on-demand with a flexible pay-as-you-go model, whilst ensuring the security of your information.

Customer Benefits

Davis & Shirtliff now enjoy all the power and efficiency of Microsoft's hyperscale Cloud services, with key ERP systems using Azure's high-performance SQL Managed Instances, along with a reliable hosting platform for their web and application servers.

All of this infrastructure is protected with strict access controls, combined with real-time monitoring, a robust web application firewall and live replication of business information systems.

Improved systems uptime and performance empower the business to be more productive and efficient.

With lower licensing costs, improved segregation and a more scalable platform, IT can manage resources much more easily.

With the flexible monthly billing of all Azure services, and great budget controls; costs are always in check.
