

Toyota Tanzania scale with Liquid Telecom and Microsoft Azure Stack

Toyota Tanzania has been serving the local market for over 55 years and their new growth is driving demands for improved IT systems.

Needing improved performance for mission critical databases and server infrastructure, their IT team worked with Liquid Telecom to migrate key servers to Azure Stack.

The Liquid Telecom solution, using existing high-speed connectivity and locally hosted Azure Stack, is able to deliver a true hybrid solution improving database performance, uptime and security as part of a single project.

At-a-glance:

- **Customer:** Toyota Tanzania
- **Country:** Tanzania
- **Website:** <http://www.toyota.co.tz>
- **Industry:** Automotive
- **Customer Size:** 40+ staff
- **Products and Services:** Microsoft Azure Stack

Liquid Telecom, Toyota Tanzania & Microsoft Azure Stack

Customer Challenges

Toyota Tanzania had a traditional on-premises server environment that was struggling to keep up with the demands of their users and growing customer database. With hardware due for replacement, they needed to find a solution that was cost effective, scalable and yet secure enough to handle mission critical business information hosted locally.

The solution needed to provide great performance for both SQL databases and Linux-based servers.

Why Microsoft Azure Stack?

As your business continues to grow, you need an intelligent and agile cloud platform that can keep up. Microsoft Azure Stack is the answer to all your local cloud needs with an ever-expanding set of services that offers real-time access to virtual machines, developer tools and computing power, hosted locally in-country with Liquid Telecom.

Whether you want to extend your infrastructure or add new cloud capabilities, you have the freedom to scale, whilst ensuring the security and compliance of your information systems.

Customer Benefits

Toyota Tanzania now enjoy the performance and security of their servers hosted on Azure Stack, ensuring their business-critical systems are always available, easily scalable and fully compliant with local regulations, whilst adhering to Toyota's strict global security standards.

Improved local compliance, reduced latency and easy scalability empower your business.

Secure connectivity and access controls ensure business information is protected at all times.

With the flexible monthly billing of all Azure services, and great budget controls; costs are always in check.
